#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3, 7, 8, 10, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Debronsky, Jr. et al. (5,797,142). Debronsky discloses a washcloth that is structurally adapted to perform as a handkerchief having a base layer of soft absorbent material and a pouch layer of soft layer of material attached to base layer forming a pouch thereon. The article of Debronsky is sized within the limitations set forth in Claims 1, 7, 8, 13, and 14. With respect to Claim 2, the base layer and the pouch layer are both made of cloth. With respect to Claim 3, the base layer and the pouch layer are made of terry cloth. With respect to Claim 10, the pouch layer shown in FIG. 2B is U-shaped.
- 3. Claims 1, 2, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Sutton (2,119,895). Sutton discloses a washcloth that is structurally adapted to perform as a handkerchief having a base layer of soft absorbent material and a pouch layer of soft layer of material attached to base layer forming a pouch thereon. Washcloths are well known to be within the range of 9 square inches and 576 square inches. With respect to Claim 2, the base layer and the pouch layer are both made of cloth. With respect to Claim 11, the pouch is rectangular shaped.

Application/Control Number: 10/772,551 Page 3

Art Unit: 3765

4. Claims 1, 2, 11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Moss (5,326,610). Moss discloses a washcloth that is structurally adapted to perform as a handkerchief having a base layer of soft absorbent material and a pouch layer of soft layer of material attached to base layer forming a pouch thereon. Washcloths are well known to be within the range of 9 square inches and 576 square inches. With respect to Claim 2, the base layer and the pouch layer are both made of cloth. With respect to Claim 11, the pouch is rectangular shaped. With respect to Claim 13, the pouch opening is located between 2 and 4 inches below the upper edge of the base layer. With respect to Claim 14, the pouch extends downwardly below the pouch opening between 2 and 5 inches.

5. Claims 1, 9, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Benedict (2,006,708). Benedict discloses a washcloth that is structurally adapted to perform as a handkerchief having a base layer of soft absorbent material and a pouch layer of soft layer of material attached to base layer forming a pouch thereon. Washcloths are well known to be within the range of 9 square inches and 576 square inches. With respect to Claim 9, the pouch is V-shaped. With respect to Claim 12, FIG. 3 shows a cross-section of the article having two separate pouches located side by side on the base layer.

#### Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/772,551 Page 4

Art Unit: 3765

7. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moss (5,325 610) in view of Orr (3,871,027). Moss essentially teaches the invention of Claim 4, but fails to teach the use of non-woven material, paper, or cellulose pulp for the base layer and the pouch layer. Orr discloses the use of non-woven material, paper, and cellulose pulp for making an absorptive pad similar to the invention of the instant application. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated any of the materials required in Claims 4-6, as taught by Orr, to increase the ability of the article to absorb liquids and lower manufacturing costs.

## Allowable Subject Matter

Claims 15 and 16 are objected to as being dependent upon a rejected base claim, but 8. would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G Smith whose telephone number is 703-605-4225. The examiner can normally be reached on 8:00-5:00, off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John J Calvert can be reached on 703-305-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
